LINEAR SHOWER DRAINS

**BULGARIAN
MANUFACTURER**

TANUSHEV®

We started the company in the long past years of 1992 with the production of various kinds of metal products. Over the time, our main focus became the production of linear and floor shower drains, bathroom accessories and various products made of solid polished brass and stainless steel. For the past years, we have successfully become one of the leading companies in this industry, thanks to our gained experience and partnership with time-proven companies. Still, this would not have been possible without the trust we get from you – our customers, all these years, because it is exactly you who give the most accurate valuation for our products and have supported our development. That is why we strive for continuous improvement of the quality of offered goods, of increasing and diversifying the assortment in order to better meet your requirements, of maintaining affordable prices and always use high quality materials and technologies.

Linear shower drains

The linear shower drains “TANUSHEV” are entirely made of high-quality stainless steel, which guarantees long-lasting and trouble-free operation, backed with a 10-year full warranty. The water seal, with over 600 hours of action, guarantees protection from bad smells even during a long-term absence from home, and the debit – 30 l/min is enough to take up all the water supplied by the plumbing.

All shower drains “TANUSHEV” have been tested at the Research Institute (“NISI” – Sofia) and the quoted parameters are from official protocols based on runned tests.

Instalation
height
90 mm

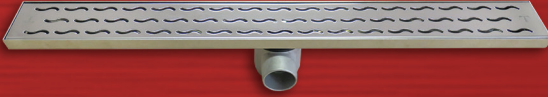

Water
seal
600 hours

Debit
30 L/min
